### **DETAILED ACTION**

1. This office action is in response to the amendment filed on October 13, 2006.
2. Claim 41 is amended. Claims 1-40 and 42 are canceled. Claim 41 is pending and presented for examination for this office action.

### ***Drawings***

3. The drawings filed on 03/21/2000 are acceptable subject to correction of the informalities indicated on the attached "Notice of Draftsperson's Patent Drawing Review," PTO-948. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.

### ***Allowable Subject Matter***

4. Claim 41 is allowed.

The following is a statement of reasons for the indication of allowable subject matter: Claim 41 identifies distinct features, "identifying a user with a phone number; starting a new session for the user; adding a new interaction; updating a preference of the user within a domain; enabling the preference of the user within the domain;

Art Unit: 2166

disabling the preference of the user within the domain; updating an expertise level of the user; updating personal information of the user; updating session state of the user; adding credit card information of the user; and updating the credit card information of the user; applying text patterns to the obtained data and placing the obtained data in a first data file; providing a second data file containing the obtained data in a uniform format; and generating grammatical sentences from the obtained data according to a specific user interface in the second data file". The closest prior art, Bijl et al (U.S. Patent No. 6,336,882) disclosing transforming semantically structured data using a user interface in network computers, fails to suggest the claimed limitation as mentioned above in combination with other claimed elements. The above features in conjunction with all other limitations of the independent claim 41 are hereby allowed.
